Sir:

This Amendment to the above noted United States Patent Application is to direct the entry of the Sequence Listing both as paper copy and as computer readable form (CRF) (diskette enclosed) into Patent Application 10/804,954 which was filed on 03/19/2004 by Marise S. Gottlieb. This Amendment is made in responses to the Formalities Letter mailed to the Applicant on March 10, 2005 and to which a No Fee Reply is due by May 10, 2005. The copy of that letter which is to be returned is enclosed herein.

The Applicant certifies that the content of the sequence listing information recorded in computer readable form (CRF) (diskette) and on the paper copy is identical to the written sequence listing, and includes no new matter. The paper copy and diskette enclosed herein were produced using PatentIn 3.3 Software, including its Validation routine, running under the MS-Windows 98 operating system. As well, the information was checked using CHECKER.

The peptide sequences referred to in this amendment are referred to on page 6, line 22 and page 7, lines 13-14 of the instant application and are the sequences Tyr-Gly-Gly-Phe-Met, known as Methionine-Enkephalin, and Tyr-Gly-Gly-Phe-Leu, known as Leucine-Enkephalin. These peptides are shown in the descriptive portion of the specification of the instant application but are not part of or referred to in the Claims.

I declare under penalty of perjury that the foregoing statements are true. Subscribed at New Orleans, LA, April 12, 2005.

Marise S. Gottlieb
